

BRYAM CAMILO ACEVEDO

Mid Level Data Scientist & Machine Learning Engineer

Bogota, Colombia • +57 319 252 4741 • acevedo8022013@gmail.com • LinkedIn: [bryam-camilo-acevedo](#) • GitHub: [bryamplaying](#)

PROFESSIONAL SUMMARY

Data Scientist & Machine Learning Engineer with 3+ years of experience in developing, implementing, and deploying Machine Learning and Artificial Intelligence solutions in high-scale production environments. Specialized in designing predictive models, classification systems, and segmentation, with expertise in ensemble learning techniques, hyperparameter optimization, and advanced feature engineering. Extensive experience in building robust data pipelines and MLOps architectures that ensure reproducibility, versioning, and continuous monitoring of models in production. Creator of a proprietary Python framework that standardizes the complete Machine Learning lifecycle, from preprocessing to automated deployment, integrating MLflow for experiment tracking and artifact management. Strong academic background with an ongoing Master's degree in Artificial Intelligence, supported by knowledge in applied statistics, computational mathematics, and experimentation methodologies. Complementary experience in Deep Learning for specific use cases in time series and synthetic data generation.

TECHNICAL SKILLS

Machine Learning & AI: Supervised and Unsupervised Learning, Regression, Classification, Clustering, Ensemble Methods (XGBoost, LightGBM, CatBoost, Random Forest, Gradient Boosting), Feature Engineering, Feature Selection, Hyperparameter Tuning (Optuna, GridSearchCV, RandomizedSearchCV), Cross-Validation, Model Evaluation, A/B Testing, Causal Inference

MLOps & ML Lifecycle: MLflow (Tracking, Model Registry, Projects), Model Versioning, CI/CD Pipelines, Docker, Training Automation, Model Monitoring, Feature Stores, Experiment Reproducibility, Artifact Management, Azure DevOps, GitLab CI, Jenkins

Programming & Frameworks: Python (Advanced), R, SQL (Advanced), scikit-learn, Pandas, NumPy, SciPy, Statsmodels, PySpark, Spark MLlib, TensorFlow, PyTorch, Keras, NLTK, OpenCV

Cloud & Big Data: Microsoft Azure (Databricks, Azure ML, Data Factory, Synapse Analytics), AWS (SageMaker, S3), Apache Spark, Apache Airflow, Kafka, Distributed Architectures, Large-Scale Data Processing

Data Engineering: ETL/ELT Pipelines, Data Warehousing, SQL Server, PostgreSQL, MySQL, MongoDB, Delta Lake, Data Modeling, Data Quality, Heterogeneous Source Integration

Software Development: RESTful APIs (FastAPI, Flask), Microservices Architecture, Design Patterns, Git/GitHub, Testing (pytest, unittest), OOP, Clean Code, Agile Methodologies (Scrum)

Analytics & Visualization: Descriptive and Inferential Statistical Analysis, Hypothesis Testing, Power BI, Tableau, Matplotlib, Seaborn, Plotly, Streamlit, Exploratory Data Analysis (EDA)

LEADERSHIP & MANAGEMENT SKILLS

Technical Leadership: Leading multidisciplinary teams in high-complexity projects, defining technical roadmaps, making architectural decisions, and mentoring junior and mid-level professionals in ML/Data Science best practices.

Strategic Communication: Ability to translate complex technical concepts to non-technical stakeholders, presenting results at executive level, preparing technical documentation, and facilitating collaborative work sessions.

Continuous Improvement & Innovation: Constant learning mindset, proactive research of new technologies and methodologies, implementing retrospective processes and continuous optimization of development workflows.

Project Management: Experience in agile methodologies (Scrum, Kanban), sprint planning, effort estimation, technical risk management, and on-time delivery of milestones within scope.

Analytical Thinking: Structured approach to complex problem-solving, information synthesis capability, experiment design, and evidence-based and data-driven decision making.

Cross-functional Collaboration: Effective work with engineering, product, business, and operations teams, facilitating integration between technical and strategic areas to maximize ML solution impact.

PROFESSIONAL EXPERIENCE

Mid Level Data Scientist

Global Hitss (Claro/America Movil Client) | Bogota, Colombia | May 2025 – Present

- Design, training, and validation of Machine Learning models (regression, classification, clustering) with hyperparameter optimization and rigorous metric evaluation (AUC-ROC, F1-Score, Precision, Recall), achieving measurable improvements in business KPIs.
- Development of proprietary Python library for comprehensive ML lifecycle management, integrating automated preprocessing, parameterized training, MLflow versioning, and standardized deployment, reducing time-to-production by 60%.
- Implementation of MLOps pipelines with Azure DevOps, establishing quality standards, technical documentation, and automated workflows adopted by multiple development teams.

Data Scientist / Machine Learning Engineer

Global Hitss (Claro/America Movil Client) | Bogota, Colombia | Jan 2023 – May 2025

- Development of predictive models for churn, propensity, and segmentation using XGBoost, LightGBM, and Random Forest, complemented with neural networks (LSTMs) for time series and GANs for synthetic data, impacting 2M+ users.
- Design and implementation of scalable ETL pipelines with PySpark and Apache Airflow, processing 10M+ daily records, integrating heterogeneous sources (SQL Server, PostgreSQL, MongoDB) with RESTful APIs in FastAPI for real-time serving (50K+ requests/day).
- Management of 100+ experiments with MLflow (tracking, versioning, Model Registry), ensuring reproducibility, complete traceability, and documentation of production models.

Data Analyst / Junior Data Scientist

Claro Colombia | Bogota, Colombia | Jan 2022 – Jan 2023

- Development of Machine Learning models for employee turnover prediction and performance analysis using scikit-learn and XGBoost, generating actionable insights in People Analytics.
- Design and implementation of analytical dashboards in Power BI integrated with predictive models, improving Human Resources data management efficiency by 40%.
- Automation of data pipelines with Python and SQL, reducing processing times by 50% and eliminating manual errors in critical reports.

KEY PROJECTS

MLOps Framework for Machine Learning Lifecycle

Proprietary Python library in production | 2024 – Present

- Modular framework architecture: automated preprocessing (encoding, imputation, scaling, feature engineering), training with unified multi-algorithm interface, and Bayesian hyperparameter optimization with Optuna.
- Native MLflow integration for automatic logging, Model Registry with semantic versioning, and explainability modules (SHAP, LIME) for model interpretation and governance.
- 40% reduction in development time, MLOps best practices standardization, and adoption by 5+ internal teams with automated deployment pipelines.

Corporate MLOps Standards Design & Implementation

ML model governance and lifecycle framework | 2023 – Present

- Design of corporate ML lifecycle standard: reference architecture, repository structure, code conventions, CI/CD pipelines, and approval workflows for environment promotion (dev/staging/prod).
- Implementation of governance framework with MLflow Model Registry, semantic versioning policies, standardized templates (cookiecutter), and monitoring metrics (data drift, model drift, automated alerts).
- Data Science team training and onboarding, achieving 100% adoption in new ML projects with mandatory documentation and complete data lineage traceability.

Time Series Predictive System

Advanced forecasting for business metrics | 2023 – 2024

- Development of model ensemble (ARIMA, Prophet, LSTMs, Temporal Fusion Transformers) for demand forecasting with 30% MAPE reduction.
- Implementation of anomaly detection system with Isolation Forest and Autoencoders for proactive business metrics monitoring.
- Automated inference pipeline with periodic prediction updates and real-time alerts for significant deviations.

Predictive Scoring & Intelligent Customer Segmentation Platform

End-to-end predictive model system for business decisions | 2023 – 2024

- Credit scoring and propensity system with ensemble (XGBoost, LightGBM, Logistic Regression), dynamic segmentation (K-Means, DBSCAN), and centralized Feature Store for training/inference consistency.
- Real-time scoring API with FastAPI (100K+ daily evaluations, <200ms latency), SHAP values interpretability for regulatory compliance, and event-driven Kafka integration.
- Measured impact: 35% increase in campaign conversion rate and 20% reduction in default rate through improved segmentation and automated decisions.

EDUCATION

Master of Science in Applied Mathematics and Computer Science – Artificial Intelligence

Universidad del Rosario, Bogota, Colombia | 2024 – Present

- Specialization in Machine Learning, Computational Statistics, Optimization, and Advanced Numerical Methods.

Bachelor's Degree in Business Administration

Corporacion Universitaria Minuto de Dios (UNIMINUTO), Bogota, Colombia | 2018 – 2023

- Training in business management, financial analysis, and data-driven decision making.

CERTIFICATIONS

- Machine Learning Specialization – Stanford University / Coursera (Andrew Ng)
- Deep Learning Specialization – DeepLearning.AI / Coursera
- MLOps Specialization – DeepLearning.AI / Coursera (Machine Learning Engineering for Production)
- Data Science Professional Certificate – IBM / Coursera
- Applied Data Science with Python Specialization – University of Michigan / Coursera
- SQL for Data Science – University of California, Davis / Coursera
- Apache Spark and Python for Big Data – Udemy
- Statistics for Data Science and Business Analysis – Udemy
- Data Engineering with Python – DataCamp Professional Certification
